AC-2025-LON-004293 | BV20D01752 | BL-2024-001217 | N08YX064

17 April 2026

This document records the institutional handling of formally raised matters concerning a disabled litigant in person across four parallel proceedings between October 2025 and April 2026.

Every fact stated in this document is independently verifiable from court filings, sealed orders, official correspondence, and public records. The complete documentary archive is publicly available, indexed, and timestamped.

THE BINARY QUESTION

A central question arising from these proceedings is as follows:

Does an identifiable judicial order revoking Mrs Zahmoul's statutory participation measures under FPR Part 3A exist — or does it not?

If such an order exists, it can be identified precisely — judge, date, order, and reasons. No such order has been identified in response to those enquiries. If it does not exist, the measures were revoked administratively, without authority, and every procedural step taken after that revocation was taken against a disabled litigant without the protections the court itself had determined she required.

This question has been formally raised with the Family Division, the Administrative Court, the Court of Appeal, HMCTS, the Justice Committee, the Lord Chancellor, and the Metropolitan Police.

WHAT HAPPENED

February 2024. A ten-day final hearing took place before Mr Justice MacDonald in the Family Division of the High Court. During oral evidence, 22 references were made to the applicant's autism and PTSD. These references are documented in the attendance notes prepared by counsel's pupil.

19 February 2024. Karim Zahmoul gave sworn financial disclosure. Oxus Acquisition Corp shares were declared at \$0. The SEC Proxy Statement dated 16 January 2024 — 34 days earlier — confirmed the value at \$565,000. The Business Combination closed on 7 February 2024. The shares launched on Nasdaq on 8 February 2024. The declaration of \$0 was made 11 days after the Nasdaq launch.

18 April 2024. The judgment was handed down. It contains 111 paragraphs. It contains zero references to autism. It contains zero references to PTSD. It does not address the Oxus discrepancy. It does not examine the sworn declaration of \$0 against the SEC-confirmed value of \$565,000 and the Nasdaq market price.

Post-trial. The participation measures that had been granted during the trial were revoked. No order was made. No hearing was held. No reasons were given. No notice was provided.

Without participation measures, the applicant was not included in draft order negotiations. A final order was made on the respondent’s unilateral terms. A decree absolute was granted and is being appealed. No payment has been received from the settlement. Three debt claims have been filed:

Detach Lending Limited (BL-2024-001217): approximately £1.1 million. Litigation funding loan. Debt accruing at £281.38 per day.

Withers LLP (N08YX064): £128,218.15. Former solicitors’ fees. Default judgment entered 8 April 2026. The applicant did not receive the claim form. Service was effected at an address she left in June 2023. A service challenge has been filed.

GLD costs (AC-2025-LON-004293): £3,125.50. Costs of a judicial review that was refused on grounds that do not correspond to the claim as pleaded.

Total exposure: £1,231,343.65. The applicant has £89 in her bank account.

The judicial review. In December 2025, the applicant filed a judicial review raising seven specific grounds concerning administrative acts. On 11 March 2026, Collins Rice J refused permission on the papers. The order states that the applicant made “criminal complaints” against her husband and complains of the defendants’ response. The claim was not about criminal complaints. It was about administrative acts. Ground 7 — the administrative void — is not mentioned in the order. The order appears to address a different characterisation of the claim from that pleaded.

The court’s own correction mechanism. A CPR 3.1(7) application asking the court to correct its own order was sealed on 12 March 2026. As at 17 April 2026, it has not been assigned to a judge. It has not been determined. 36 days have elapsed.

The trial audio. On 15 April 2026, the court-approved transcription company Marten Walsh Cherer reported that the audio recording of the ten-day final hearing is corrupted and not working. The audio is the only independent record of what was said at trial. Responsibility for providing a working copy has not been resolved.

The recusal application. A recusal application was filed against MacDonald J on 10 February 2025. It has not been determined. 14 months have elapsed.

The criminal referral. A criminal referral for perjury, misconduct in public office, and money laundering was filed with the Metropolitan Police on 20 March 2026. Six channels have been attempted across 27 days. Seven separate reference numbers have been generated. None are connected in the MPS system. The primary reference cannot be accessed by the MPS’s own system. No officer has been allocated. A complaint has been filed with the Independent Office for Police Conduct.

The international dimension. The matter is under active investigation by IRS Criminal Investigation, New York Field Office. An SEC Whistleblower submission is on record. The controlling shareholder of Oxus Acquisition Corp is Kenes Rakishev, a Kazakh national with documented connections to Prince Andrew, Duke of York.
