Sir Mark,

Further to my Formal Request of 19 May 2026, I write with a supplementary submission to the existing Metropolitan Police criminal referral file CCR-6501-26-0100-000.

The Formal Request of 19 May 2026 set out the perjury allegation in respect of the sworn \$0 valuation of 19 February 2024 contrasted with the SEC Definitive Proxy Statement valuation of approximately \$565,000 of 16 January 2024.

This supplementary submission places before the Service the wider network within which the Oxus discrepancy arose: the documented relationship between Andrew Mountbatten-Windsor and Kenes Rakishev, the controlling shareholder of Oxus Acquisition Corp; the structural function of the Oxus and Tavia SPAC vehicles; and the documented intermediary role of David Stern between Andrew Mountbatten-Windsor and Jeffrey Epstein. Andrew Mountbatten-Windsor was arrested on 19 February 2026 on suspicion of misconduct in public office during his tenure as UK Special Representative for International Trade and Investment.

The Analytical Briefing and Document Index attached set out the documentary record. The exhibits NZ-L-01 through NZ-L-11 are primary source materials drawn from US federal court records, congressional records, SEC EDGAR, the US DOJ Epstein files released January 2025, and published investigative journalism.

The relevance to the perjury allegation under file CCR-6501-26-0100-000 is structural rather than direct. The sworn \$0 valuation of 19 February 2024 was made by a director of an entity controlled by a named non-executive chairman whose network has been the subject of US congressional investigation, US federal court litigation, and an SEC whistleblower submission (reference TCR 17284-760-060-567 of 9 October 2024,

naming IRS:CI Special Agent Robert McGarry as the assigned federal agent).

The supplementary submission is provided for completeness within the existing criminal referral file. The asks of 19 May 2026 — record, assess, and provide a reasoned written response within 14 days — remain.

Respectfully,

Nadia Zahmoul
