Dear Kenes,

Below is the Water plan.

It is an international consortia providing consultation and delivery of integrated high quality solutions for water Supply and Sewerage.

A non exhaustive list of areas of interest are as follows:

- a) Water treatment, distribution through water network, metering process at consumer, invoices recovery (if required) / customers services
- b) Collection of waste water, transportation to waste water treatment plant, treatment of waste water, reuse of treated waste water

We would like to discuss the potential of supporting (by providing technical/environmental solutions applying immediate measures as well as capacity building initiatives) the Water Company and/or Water Authority in their efforts to improve the present level of services in water and sewerage.

The lead consortium member at this point is " The Athens Water Supply and Sewerage Company, EYDAP S.A. ". It was founded in 1926. EYDAP covers the daily needs for water supply and sewerage in the greater Athens area, serving 86 municipalities and over 4.500.000 inhabitants. The CEO of EYDAP will accompany on the visit.

Additionally Amanda in my office has put Andrea Bubb, with whom I am connecting you, in touch with Dauren Toleukhanov, Deputy head of the PM's office.

I will put Andrea in touch with you by email now that I have sent you this background email.

A
