Attachments: Section 42 Care Act 2014 enquiry — referral 0103/17APR26 — request for substantive response within 14 days") to RBKC + clinical team + GP + MPS Safeguarding + IOPC..eml

Dear Sir or Madam,

I write to place on the record an operational safeguarding action taken today.

At Annex A is the text of an email sent today to the Royal Borough of Kensington and Chelsea Adult Social Services, copied to my treating clinical team, my general practitioner, the Metropolitan Police Service Safeguarding desk and the Independent Office for Police Conduct. The email seeks substantive response on a section 42 Care Act 2014 referral that has been open since 17 April 2026 and on which no local authority adult social care contact has yet been made.

I copy this notification to the public record because the institutional silence pattern that has necessitated the operational safeguarding action is itself the matter in issue in the live judicial review, AC-2025-LON-004293.

The judicial review has been at permission stage for five months. Over the same period my clinical position has deteriorated, as documented by my treating clinicians. The relationship between sustained institutional silence and clinical deterioration in vulnerable adults is recognised in safeguarding law and guidance.

The documentary position is as follows. Since October 2025, twenty-six substantive submissions have been filed within the judicial review forum. Sixteen remain without substantive determination. In the same period, forty-two submissions have been filed within the parliamentary forum. Twenty-seven remain without substantive response. The chronologies are on the public archive.

I ask no recipient of this notification to take any specific action. I write to record, transparently, that the safeguarding action at Annex A has been taken, and that the institutional silence pattern documented in the public archive is now formally on the safeguarding record.

Yours faithfully,

Nadia Zahmoul

Annex A — text of email sent today to RBKC Adult Social Services and copied to clinical team, GP, MPS Safeguarding and IOPC.

Dear Sir or Madam,

I write to update an existing safeguarding referral and to formally request information on the section 42 enquiry that should have followed it.

Facts. On 17 April 2026 the Metropolitan Police Service initiated a referral under section 42 of the Care Act 2014. The reference is 0103/17APR26. I received notification of the referral by SMS the same day. On 28 April 2026 two MPS officers attended in person for further interview in connection with the underlying matters. Eighteen days have now passed since the referral was opened. I have received no contact from any local

authority adult social care team. I have not been allocated a social worker. I have not been notified of the outcome of any section 42 enquiry, nor of the timeline within which one is expected.

Request. Under section 42(2) of the Care Act 2014 the local authority must make, or cause to be made, whatever enquiries it thinks necessary to enable it to decide whether any action should be taken in the adult's case and, if so, what and by whom. Statutory Guidance paragraph 14.77 requires that enquiries are proportionate and timely. I am writing to ask: what enquiries have been made or caused to be made since 17 April 2026; who is the allocated social worker; what is the expected timeline for completion of the enquiry; and what protective steps, if any, have been put in place. I would be grateful for a substantive response within fourteen days.

Clinical position. I am autistic (NHS-diagnosed by CLAAS, July 2025), with chronic PTSD (NHS-diagnosed since 2013), and biopsy-confirmed Sjögren's in active flare since October 2025 under the specialist care of Dr Omar Shoukry of the Central and North West London NHS Foundation Trust. My clinical position has deteriorated over the period in which the section 42 referral has been open. The factors causing the deterioration are not idiopathic. They include sustained institutional non-engagement across the judicial review forum (AC-2025-LON-004293, in which sixteen of twenty-six submissions filed since October 2025 remain without substantive determination), the parliamentary forum (in which twenty-seven of forty-two submissions filed in the same period remain without substantive response), and ministerial channels. The relationship between sustained institutional silence in the face of documented vulnerability and clinical deterioration in adults at risk is recognised in the safeguarding literature and in Care Act statutory guidance (paragraphs 14.13 to 14.17, organisational abuse and neglect).

I would be grateful for an acknowledgement of receipt within forty-eight hours and a substantive response within fourteen days.

Yours faithfully,

Nadia Zahmoul
